WHY DOES YOUR DOG NEED PREVENTIVE CARE?

Regular veterinary care is essential for your adult dog's continued health. Best of all, this plan features budget-friendly monthly payments – making it easy to manage your dog's healthcare costs.

Vaccinations help healthy dogs stay healthy

Your veterinarian will recommend the vaccination protocol that is most appropriate for your dog based on lifestyle, breed, and other important factors.

Disease can creep up quickly and quietly

Dogs age more rapidly than we do. So even if your dog looks perfectly healthy, illness and disease could be lurking undetected. Physical exams and diagnostic tests are crucial for finding problems not visible to the naked eye.

Prevention is the key to better health

Preventive care can improve your adult dog's quality of life and help add more healthy years. It's essential for detecting diseases early on, before they become more serious – and more expensive.
